

1,1 difluoroethane	propellant in aerosols
10-Hydroxycarbazepine	metabolite of carbamazepine
11-Hydroxy Delta-9 THC	metabolite- main active metabolite of THC
6-monoacetylmorphine	metabolite of heroin. Precursor to morphine.
7-amino clonazepam	metabolite of clonazepam
acetaminophen	analgesic, antipyretic
acetone	solvent, ketone body. May be metabolized to isopropanol
alpha-hydroxyalprazolam	metabolite of alprazolam
alprazolam	antianxiety agent, benzodiazepine
amitriptylene	antidepressant (tricyclic)
amphetamine	stimulant
atropine	anticholinergic, usually from resuscitation
baclofen	antispasmodic, used for spinal injury etc
benzodiazepines	antianxiety agent, antiseizure, EOTH withdrawal
Benzoyllecgonine	metabolite of cocaine
bupivacaine	local anesthetic (Marcaine)
bupropion	antidepressant, smoking cessation
caffeine	stimulant
carbamazepine	anticonvulsant (Tegretol), also bipolar disorder
carbazepine	anticonvulsant (Tegretol), also bipolar disorder
Carboxyhemoglobin	binding of hemoglobin to carbon monoxide (carbon monoxide poisoning)
carisoprodol	muscle relaxant (Soma)
chlordiazepoxide	alcohol withdrawal (Librium), benzodiazepine
chlorpheniramine	antihistamine
citalopram	antidepressant (SSRI) (Celexa), also antianxiety
clonazepam	anticonvulsant, muscle relaxant, benzodiazepine
cocaethylene	metabolite of cocaine formed in presence of ethanol
Cocaine	stimulant, local anesthetic
codeine	analgesic, cough suppressant, byproduct of opium
cotinine	metabolite of nicotine
cyclobenzaprine	muscle relaxant
delta-9 carboxy thc	metabolite of THC
delta-9 thc	"Parent" THC
desmethyldoxepin	metabolite of doxepin (tricyclic antidepressant)
dextro / levo methorphan	cough suppressant (dextro), opioid analgesic (levo)
dextromethorphan	cough suppressant
diazepam	antianxiety, benzodiazepine (Valium)
dicyclomine	smooth muscle relaxant, irritable bowel, anticholinergic
dihydrocodeine	analgesic, antitussive, derivative of codeine
diltiazem	heart disease, calcium channel blocker
diphenhydramine	antihistamine with sedative properties
doxepin	antidepressant (tricyclic)
doxylamine	antihistamine with sedative properties
duloxetine	antidepressant (SNRI), neuralgia (Cymbalta),
EDDP	metabolite of methadone
escitalopram	antidepressant, citalopram isomer (levo)
Ethanol	alcohol

expoxide	(possibly from chlordiazepoxide?)
fentanyl	analgesic (opioid)
fluoxetine	antidepressant (SSRI) (Prozac)
fluvoxamine	antidepressant (SSRI) (Luvox)
gamma-hydroxybutyric acid (GHB)	anesthetic
hydrocodol	probably hydrocodone?
hydrocodone	analgesic (opioid)
hydromorphone	analgesic (opioid)
hydroxybupropion	metabolite of bupropion (Wellbutrin, Zyban)
hydroxyzine	antihistamine (Vistaril)
ibuprofen	analgesic, anti-inflammatory (NSAID)
isopropanol	rubbing alcohol
lamotrigine	anticonvulsant
lidocaine	anesthetic (local), anti-arrhythmic, seen in resuscitation
Lorazepam	anticonvulsant, muscle relaxant (Ativan), benzodiazepine
meprobamate	tranquilizer (Miltown), metabolite of carisoprodol
methadone	analgesic (opioid), opiate addiction withdrawal
methamphetamine	stimulant
methanol	wood alcohol, solvent
methocarbamol	muscle relaxant (Robaxin)
methorphan	either dextro- or levo-methorphan (see dextromethorphan)
metoclopramide	antiemetic, promotes gastric emptying
metoprolol	cardiac disease, antihypertensive, B-1 selective beta blocker
monoethylglycinexylidide (MEGX)	metabolite of lidocaine
morphine	analgesic (opiate)
naproxen	analgesic, anti-inflammatory, (NSAID)
nicotine	stimulant, in some insecticides
nordiazepam	metabolite of diazepam and other benzodiazepines
norfentanyl	metabolite of fentanyl
norfluoxetine	metabolite of fluoxetine
norpropoxyphene	metabolite of propoxyphene
nortriptylene	antidepressant (tricyclic), metabolite of amitriptylene
O-desmethyltramadol	metabolite of tramadol
O-desmethylvenlafaxine	metabolite of venlafaxine
opiates	analgesic, hypnotic, antitussive
oxazepam	anti-anxiety, alcohol withdrawal, metabolite of diazepam, benzodiazepine
oxycodone	analgesic (opiate)
oxymorphone	analgesic (opiate)
phenobarbital	anticonvulsant, sedative
phenylpropanolamine	stimulant, decongestant, weight loss aid
phenytoin	anticonvulsant
promethazine	antihistamine, antiemetic, sedative, used to prevent with antipsychotics
propoxyphene	analgesic (opioid) (Darvon)
pseudoephedrine	stimulant, decongestant
quetiapine	antipsychotic (atypical), schizophrenia, bipolar disorder, others
salicylate	analgesic, anti-inflammatory, topical acne treatment, anticoagulant
sertraline	antidepressant (SSRI) (Zoloft)
temazepam	insomnia, benzodiazepine

theobromine	metabolite of caffeine, also in chocolate and cola
topiramate	anticonvulsant (Topimax)
tramadol	analgesic (opioid)
trazodone	antidepressant (Desyrel and others)
triptyline	mental depression; amitriptyline
venlafaxine	antidepressant (Efexor)
zolpidem	insomnia (Ambien etc)
